Announcements: Pres Dave reminded us that next week we will have a number of guests due to the March of Dimes Kick Off. The Students of the Month were introduced, as well as their parents & teacher, they were presented with their awards after their respective teachers reported on why they had been chosen.

PURIM

March 7, 2004

FROM PAUL HARRIS

“Rotary was born in our land of freedom; it could not have been born in a despotism.”

MY ROAD TO ROTARY

TODAY IS:the 100th birth anniversary of Theodor Geisel....

TOMORROW IS: Middle of National Procrastination

MAR. 1 WAS NATIONAL PIG DAY.....SO.....

*Generally 8-12 piglets are born to a litter. The largest number of piglets in a single litter was 34, the 2-day birth occurred in Denmark.

*Pigs originated from Eurasian wild boars.

*Pigs are extremely intelligent, even more apt at learning tricks than dogs. Scientists have found their grunts have specific meanings, allowing them to communicate with each other.

*Pigs were brought to America by Columbus on his second voyage in 1493 & have since thrived & flourished.

“I believe the art of living consists not so much in complicating simple things as in simplifying things that are not.”

-Francois Hertel
